**Pompano Beach Residents Can Sign Up for
OASIS Irrigation Program to Save Water and Money**

iCanWater.com gets a makeover to make it easier than ever

The Pompano Beach OASIS program has made it possible for our residents and businesses to have lush green lawns whether it's raining or not. For every gallon of reclaimed water used for irrigation, Pompano Beach saves a gallon of potable water. Better still, while OASIS customers are saving water, they are saving money.

To ensure residents have all the information they need about OASIS (Our Alternative Supply Irrigation System) the website has been redesigned for easy access. From fact and fiction to FAQ's the website has all the What's, When's, Why's and How's to help every property owner make the decision to sign up.

"System customers are very happy with the results of OASIS," said Randy Brown, Pompano Beach Utilities Director. "They save money and at the same time, they know they are doing something good for the environment and for the future."

People can also visit Facebook and Twitter for ongoing information and notifications.
